

# Let's Strike a Balance

With over 6,700,000,000 people sharing our planet, efficient use of natural resources is important.

You can do your part to save the environment while saving money !

Are you building new or renovating?  
Make it sustainable and start saving right away!

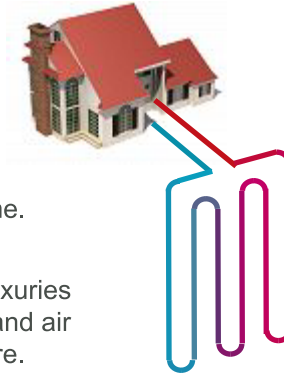

Take the step. Contact us today to see how we can help.

## Heating and Cooling

### Geothermal (Ground Source Heat Pump)

The temperature of the earth heats and cools with the seasons. This can be harnessed to warm and cool your home.

Waterfurnace has all the luxuries of a conventional furnace and air conditioner, plus much more.

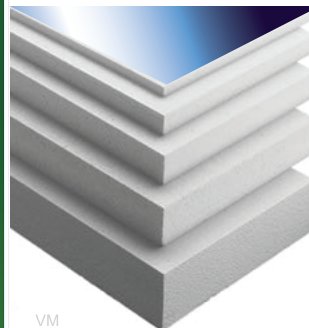

*Break Free From Rising Gas Costs This Year!*

## Ventilation Heat Recovery (HRV)

Fresh air in the winter, without losing your indoor heat.

## Insulation Cost Savings Investment

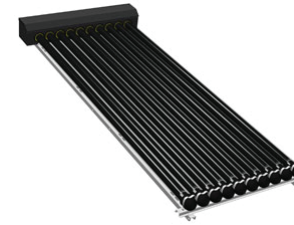

Our tightly compressed reflective insulation is available in multiple "R" values and is ideal for basement and exterior walls.

VM

## Water

### Solar Water Heating

Assistance for your home's hot water system.

### Solar Pool Heating

Economic and efficient heating for any size of indoor or outdoor pool.

### Dual & Low-flush Toilets

Stop flushing your hard earned money down the drain. Save on your bills and conserve water with a dual or low-flush toilet.

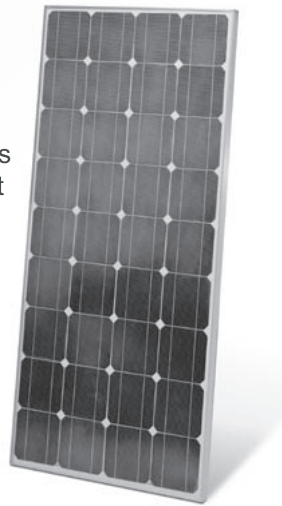

### Drain-water Heat Recovery

Collect and re-use heat escaping down your drain. Easy to install with a quick payback.

## Electrical Solar Equipment

Evergreen carries most brands of solar panels and equipment for today's renewable energy enthusiast or installer.

## Wind Equipment

Evergreen supplies and installs the leading wind products on the market, including Saskatchewan's own RAUM wind turbines and inverters.

## Accessories

Quality equipment is important for any project. Evergreen has all the accessories for your green power needs. From inverters to batteries to switches, we've got you covered.
